

FLEX-LOK STEP INSERT

A series of polypropylene inserts for the purpose of securing steps in the wall of a precast concrete manhole or other concrete structure.

BENEFITS:

- Placement of insert is done at the time of manufacture.
- Concrete wall remains watertight.
- Guaranteed alignment and projection of steps.
- Precise hole to accept step shank.
- Interference fit makes installation of step rapid and simple.
- Polypropylene offers excellent chemical resistance.

SPECIFICATIONS:

- Insert meets the requirements of ASTM C-478 section 16.
- Exceeds the performance test procedures of ASTM C-497 section 10.

Reusable Rubber Magnetic Step Insert Holders

Durable rubber strips with embedded high-power magnets hold the step inserts in place on your flat forms.

- Easy & effective way to prepare your form for steps.
- Accurate placement insures consistent position of Insert.
- No more drilling holes.
- Will not slip during pouring.
- Strips easily.
- Reuse them over and over.
- Use with A-Lok Round step insert for flatwall.

Available in 3 sizes: 1', 2' and 3'.

<u>Size</u>	<u>12" spacing</u>	<u>16" spacing</u>
1'	2 inserts per	N/A
2'	4 inserts per	2 inserts per
3'	6 inserts per	4 inserts per
